The Kharga Oasis is surrounded by desert, far from the River Nile. It is visited by more and more tourists every year. Hundreds of date palm trees are grown here. The dates are sold in many shops in the area. You can also fill your bags with the baskets, shoes and furniture that are also made from the date palm trees. The Kharga Oasis is one of Egypt's natural wonders.

Natural wonders of Egypt

Egypt is visited by more than 14 million tourists every year. We have made a list of the natural wonders of Egypt that we think visitors should know about.

The White Desert National Park

This huge desert starts on the western side of the River Nile and continues into Libya. It contains five oases, with rocks that the wind has made into strange shapes. The colours change at different times of day and make them beautiful to look at.

Al - Nayzak Lake

This natural lake is a three - hour drive from Hurghada. The lake is called the shooting Star by locals because it is believed that a piece of a star (a meteorite) fell into it. The Lake is cut out of the rock in the shape of an eye and is filled with the bright blue water of the Red Sea. It is described by the visitors as one of the best places to dive and swim.

Gebel Elba

This national park is surrounded by grassland between the Red Sea Coast and the mountains. This national park takes its name from the mountain in the middle of it. It is unusually green and home to many animals and birds. However, as it isn't easy to reach, it isn't visited often. Its location should help to protect the wildlife there.

The Fayoum **Depression** is an area of desert, **southwest** of Egypt. Many ancient fossils are often found here, but the species of animal **fossil** might surprise you; crocodiles, turtles and whales. The most amazing fossils are the whale fossils. At Wadi al - Hitan, The Valley of the Whales, hundreds of fossils of ancient whales were found by scientists in 1902. The scientists were surprised to find out that these whales had legs, so they once walked on land.

In 2005, the fossils at **Wadi al -Hitan** were studied by a team of **international** scientists. The fossils were preserved really well and some of them were 21 meters in length. It was **discovered** that these whales belong to the same family of animals as camels and giraffes. The fossils are so important that **Wadi al -Hitan** was called a UNESCO World **Heritage** Site in 2005. However, it is very remote. As a result, it is only visited by about 1,000 people a year.

Today, Egyptian scientists are studying some of the fossils at Mansoura University using some of the latest **technology**, and they hope to learn more about these amazing whales of the desert.

Black Beauty Anna Sewell

The next winter was very hard for all the horses. The **weather** was terrible. There was rain every day and it was often windy. Some of the drivers were very poor, so their horses worked all night. Other horses didn't have **stables**. They stayed out all night and got wet and cold. I was lucky because Jerry was a kind owner and I was always put in a warm stable.

One day Jerry and I waited for work next to a park. I watched as an old **carriage** drove up next to us. It was pulled by a horse who was thin and looked tired. I looked

again and saw that it was my old friend, Ginger. She looked **terrible**. We walked for a short time. Ginger was very unhappy. She had had many different homes and worked very hard. All her owners were unkind to her and treated her badly. "You are my only friend" **Ginger** told me before her owner drove her away. I understood that I had a much better life than many other horses.

The first **Pantheon** البانتيون in Rome was built in around 27 BCE. However, it was burnt down by a fire in around 80 CE. The building that we know today was built by **Emperor** Hadrian in around 120 CE. It was designed with the help of a famous **Greek builder**, who was called Apollodorus of **Damascus**. Perhaps the most amazing part of the building is a large hole in the roof. The hole was used to give the building light. Sometimes, rain falls through the hole, too. However, today, water was taken away by special pipes in the floor.

Mongoose

There are about 30 different species of **mongooses** in the world. A mongoose has a long body, with short legs and a long tail. Their bodies are covered by thick fur. Mongooses can see and hear very well, which helps them to find food and avoid **danger**. Mongooses are famous for **fighting** snakes. They are able to kill snakes by biting them.

The mongoose is found in Africa, Asia and parts of **Europe**. It lives in forests, wetlands or grassland, under the ground or rocks. In the 1800s, mongooses were taken to live in several islands in Hawaii and the Caribbean to control the rat **populations** there. However, they are endangered, mainly because of **deforestation** and loss of habitat.

Mongooses eat small animals such as rats, birds, frogs and lizards and also seeds, eggs and nuts.

Mongooses are active **during** the day and sleep at night. Although some live alone, many live in large groups of up to 50, where each one has a role to play. Some hunt and others look after the young. They can live for up to ten years in the wild.

on Lesson 1 SB page 13

In the cities of Cairo, Giza and Fayoum, there is a project that is teaching people about climate **change** and how to help the environment by **recycling rubbish**.

Over 400 women **volunteers** visit houses in these cities every week. The volunteers ask people to put their rubbish into three different bins: for plastic, paper and metal. When the volunteers come back a week later, **they pay** the families money for the rubbish they have collected. Then they **take away** the rubbish for recycling. "If families **collect** their paper, plastic and metal, we will pay them for it," says Dalia. "Then we can take away the rubbish and recycle it. It's a great **solution** to a big problem, because the family get some money and we help the environment."

Reading

Our planet is getting hotter and our weather is changing. There are more floods, **droughts** and forest fires than at any time in history. One of the reasons for this is **climate change**.

Climate change is caused by greenhouse gases such as carbon dioxide. These are made when we burn fossil fuels such as oil. Rubbish in landfill sites makes a **greenhouse** gas called methane. **Deforestation** also produces greenhouse gases. Trees absorb carbon dioxide from the air. When we cut down trees, the **carbon dioxide** stays in the air.

If we keep burning fossil fuels, climate change will get worse. So, we need to use cleaner renewable energy such as solar energy and wind power. We must start **recycling** more rubbish and stop putting rubbish in landfill sites. If we recycle more paper, we can avoid cutting down our forests. This will help slow down climate change.

Buildings cause 6% of our greenhouse gases. If we keep **building** houses in the same way, global warming will continue. I think we should **decide** to build houses that need **to use** electricity from fossil fuels. We can do this by planning **to build** houses that use renewable energy. We should also avoid **leaving** all our electrical equipment on when we are not using it!

on Lesson 3 SB page 16

Dalida: I want to print an article from the internet, but the printer is broken.

Sherifa: Really? What's wrong; **Dalida** ? Let me look. No, the printer isn't broken. It needs a new printer cartridge(2.

Dalida: Of course. You're right, **Sherifa**. I think there's a new one in the cupboard

Sherifa: What are you going to do with the old one?

Dalida: I'll throw it away. I always throw them away.

Sherifa: You can't throw it away!

Dalida: Why not?

Sherifa: That is very bad for the environment. Ink from the printer **cartridge** can get into rivers and the sea. The ink kills fish and other sea animals. It's really terrible(5), You must recycle it.

Dalida: Oh, no. I didn't know that. That sounds horrible.

Sherifa : Look! There's an address on the box. If we send the printer cartridge to that address, they will recycle it.

Dalida: OK. Let's do that. What happens to all the printer cartridges at school?

Sherifa: I don't know. I think they're thrown away.

Dalida: Well, why don't we start a recycling project?(?

Sherifa: That's a great idea.

Our school recycling project

The problem

Five classrooms in our school have a computer and a printer. At the moment, we throw away the printer cartridges with the school rubbish. But the ink inside printer cartridges is very bad for the environment. So we want to start a school recycling project.

What we are going to do

We have asked our head teacher Mr Hamdi, if we can start a recycling project, and he said yes. He will let us put a recycling box in classrooms with printers. We have written emails to all our teachers. We have asked them to put the old printer cartridges in the recycling boxes.

How you can help us

We will take the recycling boxes to the recycling center every month. But we need volunteers to help us. If you would like to be a volunteer, please write your name and email below.

Thank you

Dalida and Sherifa

Circle the correct Verb:

We all enjoy *to have / having* new mobile phones, but what should we do with our old phones? Should we keep *throwing / to throw* them away? Remember that it is not easy to make mobile phones. They need *to have / having* a lot of important materials inside them. When you throw away a phone, these materials can be very bad for the environment. I think that one day, we will not need *to buy / buying* a new phone every few years. People will design phones that can use the latest technology, even when it changes. Then, we will avoid *to throw / throwing* away our old phones. That will be very good for the environment!

Waste is a big problem around the world. However, many of the things that we throw away can easily be recycled.

- **Russia** used a plastic football field in the 2018 World Cup. It was made from 50,000 plastic cups.
- **You** can recycle cotton and wool to make new clothes. You can also use old plastic bottles to make rubbish bags and plastic bags for shopping.
- **You** can make lovely new handbags from pieces of leather that factories do not use.
- **Some** stones are very expensive, but you can make beautiful jewellery from old glass bottles.
- **When** plastic fishing nets fall into the sea, they are very bad for sea animals.

We can collect the fishing nets and recycle them into other plastic items, like sunglasses for example.

• **You** can make bricks to build houses from old plastic bottle tops. They are very strong!

Hassan's blog

Weaving is an Egyptian tradition, but there aren't many traditional weavers in Egypt today. So I was surprised to see three weavers working on traditional looms when I visited the Reform Studio in Cairo.

When Mariam Hazem and Hend Riad were students at university, they wanted to do something about plastic rubbish. They found a way of

making old plastic bags into long threads, which they could make into fabric on a traditional loom. Then they used the plastic fabric to make colourful bags, chairs and small carpets.

Today, their bags, chairs and carpets are sold in shops in Cairo and London. This is a fantastic project because it is great for the environment and great for one of our Egyptian traditions!

Seagrass is found in the sea along the coast of many countries. It is food for many sea animals, **including** turtles. Baby fish and sea animals live in seagrass because it is a safe place.

Seagrass helps keep the sea healthy and it can help stop climate change. This is because seagrass absorbs **10%** of the ocean's carbon dioxide every year. Seagrass **absorbs** carbon dioxide 35 times faster than rainforests. That is why seagrass can help stop climate change.

About 90% of all seagrass has **disappeared** from the UK's coast in the last 100 years. However, there is an environmental project in the UK that is growing new seagrass. When the plants are big enough, divers will plant them along the coast. The plants will still be quite small. **Nevertheless**, they will grow into 20,000 square metres of seagrass

1. Today I am going to talk about plants in the house. Not everyone has them, but I think you should.

2. I'd like to start by saying that plants are very good for your health.

3. To begin with, plants breathe out **oxygen**, which is a gas that we need to breathe. Also, plants often absorb pollution in the air, making it cleaner for us.

4. In the next part of my **speech**, I'd like to talk about where to put your plants. Some plants smell nice, so I put these in my balcony. And you can eat the leaves of plants called herbs, so put these in your kitchen! Spider plants look **attractive**, so I put them in an open place, like the living room.

5. I'd like to finish by saying that it is best to choose plants that grow naturally in Egypt. They will look better in your house since they will look **familiar**. Plants that grow naturally in Egypt are easier to take care of.

Climate change

Climate change means that many countries have more **floods** now because of rising sea **levels**. Most trees and plants can't live in seawater. When seawater comes onto farms, the salt in the water kills the crops and farmers can't grow anything for many years. So, people lose their farms and their homes.

However, in hot **countries** like Egypt, mangrove trees grow in the sea along the coast. Mangrove forests protect farms and **communities** from strong winds and storms. They provide homes for plants, fish and sea animals. If there were more mangrove trees, there would be fewer floods.

Now in Egypt, people are growing thousands of **mangrove seedlings** to plant along the Red Sea coast. The problems caused by rising sea levels could get worse if they didn't plant new mangrove forests. So, they are going to plant 300,000 seedlings every year. When they grow into mangrove forests, they will protect the coast from rising sea levels.

The Iron Woman

One day, a girl called **Lucy** was surprised to see the Iron Woman. She was enormous, with big red eyes. Lucy was **frightened**, but she found that the woman wanted Lucy to help her. Lucy's father worked at a factory and the Iron Woman asked her where the **factory** was. Pollution from the factory was killing all the fish in the river, so she wanted to destroy it. The Iron Woman had special **powers** so that she was able to make all the factory workers become fish. The workers all had to live in the river and started to understand how difficult life was for the fish. Lucy wanted to help the Iron Woman, but she was worried about her father. So after the Iron Woman left, Lucy called a boy called Hogarth. He was friends with the Iron Man.

'If you brought the Iron Man here,' said **Lucy**, 'we could find an answer to the problem.' The next day, Lucy met Hogarth and the Iron Man at the factory. When the Iron Woman arrived, the Iron Man told her that he had a **plan**. Soon, the Iron Woman let them become people again. They could stay people if they promised that the factory would not produce any more **pollution**. They all agreed, and the river became clean once more.

The Great Green Wall

This report is about a green initiative in Africa called the Great Green Wall. This initiative was set up in 2007 by the African Union to solve the problem of **desertification** in the Sahel region of Africa.

Desertification happens when green land becomes desert. In the Sahel region, this has happened because climate change is creating more droughts every year and people do not always farm the land well. People cannot grow food and they are losing their farms and homes.

The Great Green Wall initiative will plant millions of trees, seedlings and plants across Africa from west to east, to create a growing, green landscape. When it is finished, the wall will be 8,000 km long. It will be the biggest living thing in the world. It will create jobs for 10 million people. The trees and plants will **improve** the land for farming again, and people will be able to grow crops.

The Great Green Wall will improve the lives of everyone who lives in the Sahel region. It will also help reduce the problems caused by climate change for the whole world.

There are many green **initiatives** across the world which are helping to protect the environment. There are projects to build solar farms to create green energy. There are projects to plant seedlings and trees to give us cleaner air. At home, people are choosing to use **rechargeable** batteries and energy-saving light bulbs. Some people are buying more made of bamboo which is sustainable and doesn't cause pollution. Some people are even using air **conditioning** less often because it uses so much energy. What can you do to help protect the **environment**?

1. long = in length

The wall will be 8.000 km long.

The wall will be 8.000 km in length.

2. from.....to..... من الى

A student and his professor saw a pair of old shoes laying in the path. It belonged to a poor man who worked in a field nearby. The student wanted to play a trick on him, but the professor refused. They agreed on putting a coin into each shoe and hid themselves to watch how that would affect the poor man. The man soon came to the place where he had put his shoes. While slipping his foot into one of his shoes, he felt the coin. The man put it into his pocket. When he proceeded to put on the other shoe, he found the other coin. His feelings overcame him and he jumped over with joy thanking God. The man spoke of his sick wife and his hungry children. The student was deeply affected and his eyes filled with tears. "Now," said the professor, "isn't it much better than playing your trick?" The student said that his professor had taught him a lesson to remember.

4. What(**will**) you do if you had money?

6. Write a review of about (110) words on: (7 M)

"renewable forms of energy"

[illegible]

Review C

3 Complete the text with the correct form of the verb in brackets.

In 2020, a lot of greenhouse gases 1 **were created** (create) by deforestation in the Amazon area. Trees 2 (burn) and a lot of carbon dioxide 3 (make) by all the fires. We could avoid 4 (create) carbon dioxide by not cutting down our forests and burning the trees. We need 5 (protect) our rainforests because they are important habitats for wildlife, plants and trees. The millions of trees keep the air clean for the whole planet. The greenhouse gas methane 6 (produce) by the cows that are brought to the area after the rainforest has been destroyed. So it is time to plant more and more trees?

There are lots of ways we can protect our **environment** and build a **greener** world.

We need to use cleaner, greener energy. If **factories** had solar panels on their buildings, they would save money. We need more people to work together to get renewable energy for their **communities**. If more **communities** had a wind turbine, they would have cheaper, cleaner energy. We could also help the environment by planting more trees.

What about plastic? **Millions** of plastic bottles are used every day. When these bottles are recycled, the plastic is used to make clothes, toys, carpets and furniture!

Glass and metal can be recycled, too. We don't recycle enough and that's why there's still so much rubbish in **landfill** sites.

Complete the text with correct form of the verbs in brackets

Rubbish 1 **is produced** (produce) by all of us every day, and we need 2 (do) something about it. In many countries, most rubbish 3 (put) into landfill sites and in others, the rubbish 4 (burn). However, if countries keep 5 (do) this, it will cause a lot of pollution.

In Sweden, only about 1% of rubbish 6 (put) into landfill sites last year. More than 50% of rubbish 7 (recycle), and most houses are just 300 metres from a 'recycling station' where people can put paper, glass and plastic. The rest of their rubbish is burned in special power stations. Here, the rubbish 8 (make) into electricity and heating. These power stations cause some air pollution, but something useful 9 (create), too.

Prize-winning Egyptian helps NASA

For many years, NASA has been trying to understand what it can do with the rubbish that space **journeys** produce. Scientists have been looking for ways to solve the problem of rubbish. **Astronauts** use a lot of plastic, paper and other waste on their journeys to space. This can be a real problem. So NASA started a competition, asking the world's best scientists to try and find a solution.

Ayman Ragab is an Egyptian scientist who has always been interested in space science. In 2019, he entered **NASA's competition** and came second. Ayman **suggested** using jets of air to make the waste smaller and then help to recycle it.

Ayman is from the village of al - **Dababiya** near Luxor and graduated in Engineering from Aswan University. He has worked as a teaching assistant at the same university and now works as a researcher for a university in Finland. Since he won his prize, he has worked on **NASA's** Technology Transfer Project which looks at how to use the latest technology in space, and he has recently found ways to save energy when there is little gravity.

Exploring space - past and present

The stars and the planets have always been important to us. In ancient times, people knew what time of year it was by looking at where the stars were in the sky. The Ancient Egyptians **discovered** that a star called Sirius appeared in the sky just before the Nile flooded. An astronomer from the 2nd century, called Ptolemy, believed that the sun **orbited** the Earth. It was a popular idea that people believed for many centuries. Islamic astronomers in the 11th-13th centuries thought that the idea might be wrong. In 1532, the astronomer Nicolaus Copernicus showed that the Earth orbited the sun, but he hadn't **published** his ideas until just before he died. Copernicus hadn't wanted people to know about his ideas while he was alive, because he knew they would be unpopular.

Before the beginning of the 17th century, astronomers had only studied space with their own eyes. Then, in 1608, the telescope was invented. The Italian astronomer **Galileo** improved the design. He made the **lenses** stronger so that he could study the planets in our solar system.

The modern age is an exciting time for space discovery. We can see objects that are far away in space and look for life on other planets. What discoveries do you think we will make in the future?

مراجعہ علی المضارع التام م Present perfect
والمضارع التام المستمر Present perfect continuous

تذكر أهم نقاط المضارع التام

1 - يتكون المضارع التام من (have - has) وبعدهم التصريف الثالث

He **has** watched the film.

They **have** watched the film.

2 - نختار (has) إذا جاء الفاعل (He - She - It) أو اسم مفرد

She **has** cooked lunch.

3 - نختار (have) إذا جاء الفاعل (I - We - You - They) أو اسم جمع

They **have taken** the money.

4 - في حالة النفي نستخدم (hasn't - haven't)

Ali **hasn't mended** the car.

We **haven't visited** Aswan.

يستخدم المضارع التام مع الكلمات الآتية

1 - تأتي كل من (just - already) في الإثبات لتدل على حدوث الفعل

He **has already written** the email.

He **has written** the email **already**.

She **has just** eaten lunch.

2 - تأتي (yet) في آخر السؤال والنفي لتدل على عدم حدوث الفعل حتى الآن

Have you studied English **yet**?

She **hasn't met** her friend **yet**.

3 - تأتي (ever) في وسط السؤال

Have you ever travelled abroad?

4 - تأتي (never) في النفي بمعنى (not)

We **have never eaten** fish.

5 - تعبر (since) عن بداية الحدث ومعناها منذ أما (for) تعبر عن مدة الحدث

They **have lived** here **since** 2020.

They **have lived** here **for** 2 years.

6 - نستخدم (been to) بمعنى ذهب الى مكان وعاد أما (gone to) ذهب وما زال هناك

He **has been to** England. (He went to England and came back)

He **has gone to** England. (He is still in England)

7 - يأتي قبل (since) مضارع تام وبعدها ماضي بسيط

She **has lived** here **since** she was born.

المضارع التام المستمر

1 - المضارع التام المستمر يعبر عن حدث بدأ وما زال مستمراً و يتكون كالآتي

فاعل + have - has + been + V + ing.....

He **has been watching** the film.

They **have been cooking** food.

2 - في حالة النفي نضع (not) بعد (have - has)

He **hasn't been playing** football.

They **haven't been sitting** in the park.

3 - في حالة السؤال بـ (هل) يكون الشكل كالآتي

Have - Has + فاعل + been + V + ing.....?

Has he been revising for the exam?

Yes, he **has been revising** for the exam.

No, he **hasn't been** revising for the exam.

Have you been living in Tanta?
Yes, I have been living in Tanta.
No, I haven't been living in Tanta.

4 - في حالة السؤال الذي يبدأ بكلمة استفهام يكون الشكل كالآتي

كلمة استفهام + have - has + فاعل + been + V + ing.....?

How long have you been working as a teacher?
I have been working as a teacher for 20 years.

ملاحظه هامة جداً

المضارع التام يعبر عن حدث انتهى أما المضارع التام المستمر يعبر عن حدث بدأ وما زال مستمراً

She has cooked lunch. (انتهت من طبخ الغداء)
She has been cooking lunch. (مازالت تطبخ الغداء)

We couldn't live without satellite technology

Since the late 20th century, we have used satellite technology for many of the things we do every day. Our lives would be very different without it. Here are some of the things that we use **satellites** for.

GPS- Before satellites were invented; people had always used maps to find their way. Now, most people use GPS, which uses a system of satellites that work together. These send signals to **receivers** on Earth, which work out where you are. We have GPS in cars, on phones and even in some modern motorbike helmets!

Weather reports- Satellites allow us to study the **weather** all around the world. They send photos of the Earth from space. When these are put **together**, they show how clouds and storms are moving.

TV and the internet- Lots of people have satellite TV so that they can watch their favourite shows and sports matches. The signal goes to a receiver on the house. In some areas, **satellites** send signals to the internet, too.

I am busy,' said the sea.
I am busy. Think of me
making continents to be
I am busy,' said the sea.

I am busy,' said the rain.
'When I fall it's not in vain;
Wait and you will see the grain.
I am busy,' said the rain.

I am busy,' said the air,
'Blowing here and blowing there,

Up and down and everywhere.
I am busy,' said the air.

I am busy,' said the sun.
'All my planets, every one,
Know my work is never done.
I am busy,' said the sun.

Sea and rain and air and sun,
Here's a fellow toiler - one,
Whose task will soon be done.

Language Notes

1. find - found - found يجد

found - founded - founded يؤسس

We use The GPS to find our way.

The International Space Station

1. What is the International Space Station?

The **International Space Station** is a huge **spacecraft** 70 km above the Earth. It's a place where astronauts live and work when they go into space. Most **astronauts** stay on the Space Station for about six months.

2. How fast does it travel?

The Space **Station** orbits the Earth every day. It travels at 27,000 kilometres an hour. That means that it goes around the Earth every 90 minutes! It's one of the brightest objects in the sky and you can see it **without** using a telescope.

3. When was it built?

Lots of **countries** worked together to make the Space Station and astronauts from all around the world have stayed on it. The first piece of the Space Station went into space in 1998. Since the first **astronauts** arrived in 2000, more than 200 astronauts from 19 countries have stayed there.

4. What is life like on the space station?

Life on the Space Station is different from life on Earth in many ways. In space, washing, sleeping and eating can be difficult! But **communication** isn't a problem. **Astronauts** can send emails or make phone calls to their families back home.

My trip to the planetarium By Hassan El-Sayed

Last year, I went to the **planetarium** in Alexandria with my cousin, Magdy. I was really excited because I hadn't been to a planetarium before. Magdy lives in Alexandria, so he had visited the planetarium a few times with his family. We saw a really interesting film about Ancient Egypt. We learned about how the Ancient Egyptians had studied the stars to find out when the Nile **flooded**. They had even used the **stars** to help them build the pyramids. After the film, we went to an **exhibition** about Mars. Did you know a space robot had **explored** Mars before the end of the 20th century? It **landed** on Mars in 1997. We had an amazing time. We were there all morning, but when we left, we hadn't seen everything I'd like to **back** there again one day.

Language Notes

1. **orbit** يدور حول شيء / **spin** يدور حول نفسه
There are many satellites orbiting the Earth.

Reem You would be **amazing** at that, Fatma! I think you would be good on the TV as a newsreader, too!

Fatma No way ! I'd hate to be on TV, I would be so nervous .

Reem A radio presenter then? That would be cool! I'd like to do that .

Fatma Yes, I'd quite like to have a radio show, but I think I'd prefer to work for a newspaper .

Reem Online news is the future I think! No one will buy **newspapers** in a few years. I am going to study to be a web designer .

Fatma Well, may be I will work for online news then. I will write the stories and you can design the website!

Reem Great! And your brother can be the **photographer**, he likes taking photos !

Fatma Good idea!

Shaimaa's interview

What is a normal working day like?

I start my day early. We have a meeting at 8 am and we decide which new stories we will put on the news that day. After that, I normally spend a long time on the internet and talk to people on the phone. Then I go out with a camera operator and we do some interviews and I write about what I'm going to say.

What do you like about your job?

I like meeting different people and finding out more about the world and the things that are happening in it. At first, it was exciting to be on the TV, but it is normal for me now.

What don't you like about your job?

I don't like the long hours and sometimes we report on bad news and that can be very difficult.

How did you get your job?

I studied media and Arabic at university and then I worked for a newspaper for a while. Someone at the newspaper thought that I would be good on TV and told me about a job working in TV news.

What skills did you need to do your job?

I think you have to be interested in the world around you and also like meeting lots of different people. You need to be good at listening and writing.

Adel Did you know that they are having a new food festival next month in our village .

Fawzi Really? That's good. Why are they having it?

Adel According to the newspaper, it is to celebrate the opening of a new restaurant. It is opening next to the water tower .

Fawzi That's good news .

Adel Have you heard that they think more tourists will visit the village, too?

Fawzi Yes, tourists like visiting traditional villages like ours. What type of restaurant will it be?

- Wael** Apparently it is going to be a modern Egyptian restaurant .
Adel It will probably be expensive. But we should go to the food festival .
Fawzi Yes, all our friends want to go, too .
Wael I heard that you need to buy a ticket. I will find out how much it is .
Fawzi Good idea.

THE TECHNOLOGY OF TOMORROW

Here are three things that could be part of our lives in the future

Floating farms

One of the biggest problems we will have in the future is how to feed the world. As the population grows and sea levels rise, we won't be able to grow the food we need on the farmland we have. One solution is to build floating farms on the sea. The farms will have solar panels so they will be able to produce their own electricity.

Energy shirts

Have you heard of a shirt that can charge your phone? Scientists have made a new fabric that produces electricity as it moves. This means that we'll be able to charge our devices as we run or I walk outside

Robot assistants

When we go to hospital in the future, we may see doctors, nurses ... and robots! During the coronavirus pandemic, robot assistants worked in hospitals in Rwanda. They checked people's temperatures, collected information and even reminded people to wear masks! More importantly, they helped to keep hospital workers safe.

My goals for the future

By Hussein

I love **maths** and **science**, so when I leave **Preparatory** school, I'd like to go to a technology school. My dream is to become a robotics engineer. **Robotics** engineers can **create** anything from machines for hospitals to robots that go into space. Technology schools help students with the skills that I will need to work well with this technology, although it won't be easy. You need to pass a test to get into a technical school. Students who are **successful** often work in factories and businesses to get experience, and often get jobs there when they leave school. Sport is also a big part of my life. I like playing handball and football, but my favourite sport is running. I'm in a local team and we usually run 10 kilometres per day, but we're going to train to run longer **distances**. I'd love to do the Egyptian marathon when I'm old enough. Finally, I want to do something to help other people. When I'm older, I'm going to work as a volunteer at weekends. There is a children's hospital near my apartment. **Volunteers** go to the hospital to read to the children and play games with them. I think that would be a great thing to do, so I'm going to ask how I can help.

Our cities of the future

Africa's population is growing quickly. Experts **believe** that by 2050, there will be twice as many people in Africa as there are today. Many African countries are planning exciting new cities, where people can live, work and study. What will these cities of the future be like?

New Administrative Capital

My country is planning for a new administrative capital in the desert, east of Cairo. The New **Administrative** Capital is going to have modern universities, offices and hotels. There will be a monorail passing through the business districts. Electric trains will link the city to other cities around Egypt. The city is designed to work with smart technology. Roofs will be covered in solar panels. The shops will be cashless, and they will have more green spaces to walk round in the city.

Dalia, 15, Egypt

Diamniado Lake City

My country is planning an amazing new city: Diamniado Lake City. It will have modern apartments, offices, hotels, shopping **centres** and sports stadiums. There will be schools and **universities**. A new train will connect the new city with our capital city, Dakar, so people will be able to travel between the cities easily.

Oumar, 16, Senegal

The Green City Kigali

I live in the capital city of Rwanda, **Kigali**. It's a beautiful city and a lot of people come here to live. Now, there is a plan to create a new part of the city: Green City Kigali. The buildings will use renewable energy and reuse **rainwater**. There will be cycle lanes and good public transport, but it will also be easy to walk around the city. I think there will be lots of cities like this in Africa one day.

A technology that will change our lives By Munir Osman

In future, **driverless** cars will change all of our lives. We **will be able to** travel anywhere without **touching** the controls or even looking at the road! Driverless cars will also be better for the **environment** because they will be electric.

However, there are still some problems. Car companies will have to do lots of testing to make sure that the cars are completely safe. We will also have to make new laws and we might even have to change some of our road signs so that the cars' computers can read them.

So when will we be able to travel in **driverless** cars? Some experts believe that we will have to wait until 2030 at the earliest. Others think that driverless cars will be here much sooner, but we may still need people at the controls to begin with. It's impossible to know who is correct, but we can be sure of one thing: driverless cars will be part of our future. I'm **looking forward to** taking my first journey in one.

Flying cars

For this week's project, I researched flying cars. We now have the technology that will be able to make flying cars. In fact, engineers think that flying cars will be more like helicopters than planes. That is because **helicopters** can take off from small areas in cities. They will use electricity, because electric engines are not very noisy. Although there are **difficulties**, flying cars might be the answer to a lot of problems. Cities are becoming busier and traffic on the ground is becoming worse. If there were flying cars, people could fly to work from far away. They would not have to live in big cities. Flying cars could land on the roofs of buildings, and that would mean more

space in the streets for people to enjoy Electric flying cars would make less pollution, too.

Already, a company in Germany has **developed** a flying taxi. It will be able to carry one **passenger** and might start flying in 2022. However, journeys will be very expensive. People also worry that flying cars might not be very safe. If there were a lot of flying cars above a city, it could be very dangerous! For example, what would they do in bad weather or if there were a lot of birds? And what about planes?

In conclusion, we already have the **technology** to make drones and other things that can fly. I think that it's very likely we will see flying cars in the future.

CITY CENTRE FLOODS

Hundreds of people in a city in **Germany** were surprised to see flood water running through the streets of their **neighbourhood** last night. Heavy rains flooded this part of the city in less than an hour. Many people had to leave their homes and 15 people were taken to hospital. Mr Muller, a local businessman, said, "I saw the water going down our big, wide street. I was very **frightened**." Mrs Werner, who also lives in the neighbourhood, said, "The **floods** have damaged our beautiful home and our business. We don't know what we'll do." This flood wasn't the only one to hit the area in recent years. In 2018, a flood **damaged** over 1,000 buildings. Mr Wagner, who owns the local bakery, said, "The weather is getting worse. We've seen floods on the TV, but now we have them here!"

In the next ten to 20 years, life will be very different **compared to** life today. Our cities, the way we study and the way we work will all be different. People like you or me will be able to go into space, but the biggest change will be at work. Soon, robots will be able to do most of the jobs.

Robots can already think for themselves. With the right computer programs, robots journalists will be able to write sports **reviews** and newspaper articles. Robots will fly our planes and drive our cars. Robot doctors will soon **replace human** doctors. You will describe your illness to your robot doctor, which will then be able to look at people with the same illness, and choose the best medicine for you. Robot doctors won't be able to do everything. They just have to be better than human doctors. We won't be able to stop robots from being a big part of our lives in the future.

Read the article. Choose the correct words.

Today in history, we learned about cities. Our teacher **1said) / told** that cities were usually built in safe places where there was water. However, he told us that people **2had / was** chosen some strange places for some cities. For example, he told us that people had **3 build / built** Venice on 124 small islands. They had to put lots of long pieces of wood into the wet soil. Then they built the houses on top of the wood. **4 According to / Apparently** our teacher, the wood is still there, under the houses! He also told us about Mexico City. **5Did you know / Had you known** that the city was first built in a lake called Lago de Texcoco? They put a lot of soil in the lake, and built d city on this! I think that in the future, we will **6able / be able** to build cities in many different but safer places. For example, we will have the technology to build cities on mountains.

Baher and Marwan are talking about where people will live in the future.

Baher: In the future, I think we will be able to live in houses under the ground.

Marwan: But,..... Did you know that every year, buildings get taller and taller?

Baher: That's right. What kind of energy will they use?

Marwan:

Baher:

Marwan: They will use things like wind turbines to produce renewable energy.

Baher:

Marwan: Yes, we'll all live in tall buildings with solar energy, too.

Baher: I think this won't cause pollution.

Marwan:

3 Read the following text. Then answer the questions.

If someone asked you to name a famous trip to the moon, you would probably say the Apollo 11 trip in 1969. But did you know that when Apollo 17 went there in 1972, there had been five other trips to the moon? There have been no trips since 1972. We all know Neil Armstrong was the first person to walk on the moon, but who was the last person? That was Eugene Cernan. He was on a 12-day trip on Apollo 17 which brought the largest moon rock to Earth! When Neil Armstrong walked on the moon, he said it had been one small step for a man, but a very big step for all of us. When Eugene Cernan left the moon, he said, "We shall return, with peace and hope." So why were trips to the moon stopped? It was too expensive, but today, as technology gets better, there are plans to send spacecraft to the moon again.
